

ELECTRICAL MAINTENANCE TRAINING FOR PRINTING MACHINES

Professional training for the electrical maintenance of your printing machine

Why a W&H Maintenance Training?

Regular and professional maintenance is required to ensure the long-term and reliable operation of your high-quality W&H printing machine.

With our electrical maintenance training, your employees will be enabled by an experienced trainer to maintain and service your machine carefully and in a qualified manner.

During the training, participants get an overview of the structure and design of the machine. They learn about the hardware and diagnostic tools of the individual electrical components as well as how they are used and function on the machine.

The participants learn about the interaction of the individual modules and are enabled to use the available diagnostic options to systematically search for and correct faults.

Training content

- ✓ Structure and operation of the machine and individual modules
- ✓ Electrical components and their operation
- ✓ Function and arrangement of the safety devices
- ✓ Electrical documentation and circuit diagrams
- ✓ Diagnostic options for systematic troubleshooting
- ✓ Detect and correct errors
- ✓ Routine care and maintenance of the machine
- ✓ Finding spare parts

W&H TRAINING

In a W&H Training, you will receive practice-oriented training based on defined learning concepts and with clear learning objectives. You benefit from qualified trainers with many years of practical experience. Professional product and application knowledge go hand in hand in our training courses.
