

# OPERATOR TRAINING FOR CONVERTING MACHINES

Training for the professional operation of your converting machine

## Why a W&H Operator Training?

During operator training your employees will be qualified by an experienced trainer for the safe and professional operation of your W&H converting machine. They learn to utilize open machine potentials and to increase productivity and production quality in the long term.

In the training course, participants learn about the structure, equipment and safety devices of converting machine and understand the individual functions and technical processes. With the help of practical exercises directly on the machine, they learn how to successfully prepare and start production as well as how to professionally adjust and optimize the product.

In addition, participants will be able to recognize malfunctions and rectify them independently.

Your employees will also be able to carry out day-to-day care and maintenance of the converting machine independently afterwards.

## Training content

- ✓ Structure and operation of the machine and individual modules
- ✓ Function and arrangement of the safety devices
- ✓ Operation of the machine incl. assistance systems
- ✓ Preparation and start of production
- ✓ Management of orders, production data and order changes
- ✓ Identification of troubles and troubleshooting (operator level)
- ✓ Routine care and maintenance of the machine (operator level)

## W&H TRAINING

In a W&H Training, you will receive practice-oriented training based on defined learning concepts and with clear learning objectives. You benefit from qualified trainers with many years of practical experience. Professional product and application knowledge go hand in hand in our training courses.
