

PRINTING CONSUMABLES

Improve performance and quality with consumables from W&H

Why printing consumables?

Despite their often small sizes and costs, consumables have a strong influence on production performance and product quality. Finding the right consumables therefore is crucial to get the most out of your printing press. There are high dependencies between printing press, substrate and consumables such as ink, printing plates, doctor blades or chamber end seals. These consumables have a direct influence on both production process and printing quality.

W&H therefore offers a wide range of high-quality consumables for printing machines – originals as well as others especially adapted to W&H machines and the high demands of the printing process. Our portfolio includes consumables such as doctor blades, chamber end seals and many more.

Your advantages

- ✓ High-quality consumables especially designed for W&H machines
- ✓ Individual expert advice for your optimal consumables package
- ✓ Technical support for your production and printing related challenges
- ✓ Increased productivity and product quality
- ✓ Reduction of downtimes and set-up times

Original W&H consumables

W&H chamber end seals:

- Specialized for W&H machines
- Highest-quality standards
- For different requirements and applications

W&H doctor blades:

- For all machines
- Highest-quality standards
- For different requirements and applications

PRINTING CONSUMABLES

Improve performance and quality with consumables from W&H

Consumables consulting

To ensure you use the most efficient consumables for your needs, our experts will help you find the right solutions:

- In-depth expert analysis with regard to your machine, print job, quality and productivity
- Identification of open potentials
- Support with printing and production-related questions
- Design of an optimally harmonized consumables package
- Optimization of machine settings and the print process
- Assistance for professional machine operation
- Improvement of productivity and product quality

Together we identify the optimal consumables for your W&H printing machine to improve your performance and quality!

Software solutions

Measure the runtime of your doctor blades and anilox rollers with W&H software solutions for printing presses:

- Runtime measurement of doctor blades and anilox rolls per inking unit
- Comparison of current and last measured values
- Individual naming of doctor blades and anilox rolls
- Independent reset of the measured values per inking unit
