

ONLINE TRAINING PACKAGING PRINTING

Ink saving by laser engraved cylinder

Why should I attend this online training?

After this online training, you will be able to identify savings potentials in your processes and recognize approaches for optimization.

The training focuses on how laser-engraved cylinders can reduce production costs in gravure printing. You will learn which proven solutions lead to ink savings and speed increases in gravure printing. The course will provide information on the current status of laser engraving in copper and the available technologies in direct laser engraving. In addition, you will learn about a possible type of mileage test and learn why even the latest technologies should be regularly checked for improvements and savings potentials.

Training content

- ✓ Solutions to save ink and increase speed in packaging gravure
- ✓ Presentation of the technique of laser engraving in copper
- ✓ Test setup, execution and results on savings potentials

W&H TRAINING

In a W&H training course, you will receive practice-oriented training based on a fixed learning concept and with clearly defined learning objectives. You benefit from qualified trainers with many years of practical experience. Professional product and application knowledge go hand in hand in our training courses.
