

# MECHANICAL MAINTENANCE TRAINING FOR PAPER SACK LINES

Professional training for the mechanical maintenance of your paper sack line

## Why a W&H Maintenance Training?

Regular and professional maintenance measures are required to ensure long-lasting and reliable operation of your high-quality W&H paper sack line. With our mechanical maintenance training, the participants will be empowered by an experienced W&H trainer to carefully perform routine care and mechanical maintenance on your paper sack line.

First, participants receive an overview of the machine's structure and design. Thereby, they get to know the individual units and how they are used and function on the machine. The participants learn how the individual modules interact and acquire the knowledge to adjust the basic settings on the various apparatus independently.

We also address the identification and ordering of spare parts, including the necessary mechanical documentation.

## Training content

- ✓ Structure and operation of the paper sack machine and individual modules
- ✓ Basic setting of the sheet unit, bottom opening station and the tear-off unit
- ✓ Transport settings
- ✓ Routine care and maintenance
- ✓ Mechanical documentation
- ✓ Identification and ordering of spare parts

## W&H TRAINING

In a W&H Training, you will receive practice-oriented training based on defined learning concepts and with clear learning objectives. You benefit from qualified trainers with many years of practical experience. Professional product and application knowledge go hand in hand in our training courses.
