

# WORKSHOP FIRST TIME RIGHT

First time right and efficient in gravure packaging printing

## Why First Time Right?

In this practice-oriented workshop participants receive an overview of various technologies, processes, methods and measuring techniques in modern packaging printing. We specifically address the gravure printing process, the preparation of print data and the production of various printing forms and their specific advantages and disadvantages.

The expert lectures will be accompanied by live demonstrations in the W&H Technology Center. We impart practical application knowledge directly on our modern gravure presses. In the process we benchmark standard industry setup and coordination processes and provide recommendations for optimization. After the workshop participants are able to optimize and standardize processes to such an extent that production jobs can be released with no or no more than one color correction.

## Training content

- ✓ Various technologies and processes in packaging printing
- ✓ Detailed insights into the gravure printing process
- ✓ Preparation of print data (reproduction)
- ✓ Printing form production in gravure printing
- ✓ Color Management
- ✓ Ink formulation and ink preparation
- ✓ Film and corona pretreatment
- ✓ Efficient setup
- ✓ Benchmark of industry-standard and optimal setup and coordination processes

## W&H WORKSHOP

In our Technology Workshops, the participants work together with W&H experts to address challenges from everyday production. Small group sizes guarantee goal-oriented work and knowledge transfer for implementation in practice.
