

Product Security Incident Response Team

The Windmüller & Hölscher Group manufactures premium-quality, long-lasting products and takes cybersecurity very seriously at all stages of the product life cycle.

The Product Security Incident Response Team (PSIRT) is the central body within the Windmüller & Hölscher Group, responsible for checking and disclosing vulnerabilities. All notifications of potential vulnerabilities or other safety incidents relating to products can be forwarded to PSIRT.

The Windmüller & Hölscher Group cooperates in this regard with the Computer Emergency Response Team (CERT) of the German Association for Electrical, Electronic and Information Technologies (CERT@VDE).

Reporting a vulnerability

If you suspect that you have discovered a vulnerability in a Windmüller & Hölscher product, please report it by email to:

psirt@wuh-group.com

Your report should ideally include

- name of product affected
- description of the vulnerability
- where available: proof-of-concept, exploit or traces

Latest notifications and advisories

The latest notifications about vulnerabilities in Windmüller & Hölscher products and security advisories can be found on the [CERT@VDE](#) page.
