

MACHINE RELOCATION & COMMISSIONING

We care for professional machine relocation with a quick re-start of production

Why machine relocation & commissioning with W&H?

Are you planning to change the location of your W&H machine? Our experts will support you with successfully carrying out your project and putting your machine back into operation as quickly as possible.

Planning and implementing the relocation of a machine within the production facility or to another location involves a great deal of effort and demands considerable expertise. Our experts have extensive experience and provide you with a one-stop solution.

We support you in the project planning and develop a holistic concept for the relocation of your machine. Our service includes the safe dismantling, supervision of packaging and transport as well as the qualified assembly and commissioning of your machine at the new location.

Highly recommended are our process check and inspection before the relocation. This way we can determine the exact status, prepare necessary spare parts and overhauls. This enables a seamless and quick re-start of production. In addition to this we can ensure a long-term productivity and safety of your equipment.

Your advantages

- ✓ Professional one-stop service: from the planning to the successful commissioning
- ✓ Safe dismantling, supervision of packaging and transport
- ✓ Highly recommended option: Detailed machine inspection and overhaul
- ✓ Qualified assembly and commissioning at the new location
- ✓ Optional service: Professional operator and maintenance trainings as well as consulting

We will be glad to support you at the start of your production. As an optional service, we offer professional trainings on operation and maintenance.
