

# W&H CHAMBER END SEALS

High-quality end seals specially designed for W&H machines

## Why W&H chamber end seals?

For optimum printing results it is essential to adapt the consumables to the printing machine and the requirements of the printing process. The chamber end seals in particular have a significant impact on the efficient operation of the doctor blade chamber.

Original W&H chamber end seals are specially developed to be used on our flexographic printing presses. They are manufactured with the highest precision and are precisely aligned to the ink chambers of our individual machines. They provide the necessary density and ensure optimum ink application even at high printing speeds and long runtimes.

Our consumables portfolio includes a wide range of different end seals for various applications. This way you are optimally equipped for all challenges in your daily production.

## Your advantages

- ✓ Original end seals specialized for W&H flexo printing machines
- ✓ High-quality end seals for different requirements and applications
- ✓ Individual expert advice for your optimal end seals
- ✓ Reduction of leaks and downtimes
- ✓ Increased productivity and product quality

## GET YOUR PERSONAL CONSULTATION

Looking for the right chamber end seal? Our printing experts are happy to advise you personally on the selection of your optimal end seals for your machine and production requirements.

# W&H CHAMBER END SEALS

High-quality end seals specially designed for W&H machines

## Chamber end seals for W&H printing machines: MIRAFLEX, MIRAFLEX" and VISTAFLEX

Product Name	Properties	Max. speed	Lifetime	Inking system
CSL 350	Soft	350 m/min.	Medium	Solvent based inks
CSF 600	Medium hard	600 m/min.	Medium	Water based inks
CSS 600	Soft	600 m/min.	Medium	Solvent based inks
CSC 800	Medium hard	800 m/min.	High	Solvent based inks Water based inks
CSE 1000 S	Soft	1000 m/min.	Extra high	Solvent based inks Water based inks
CSE 1000 H	Hard	1000 m/min.	Extra high	Solvent based inks Water based inks

TURBOSEAL

## Chamber end seals for W&H printing machines: NOVOFLEX"

Product Name	Properties	Max. speed	Lifetime	Inking system
TURBOSEAL	Soft	800 m/min.	Extra high	Solvent based inks Water based inks
