

PROGRAM

TechArena EXTRUSION

9 AM / 4 PM

Introduction and Welcome
by the W&H Executive Board

9.25 AM / 4.25 PM

The new OPTIMEX II

Get to know the new OPTIMEX II blown film line with extended width up to 2600 mm. Its performance enhancing improvements for PE films let you increase your efficiency even more.

10 AM / 5 PM

TURBOSTART @ VAREX II

Increase your production efficiency by a one-button stop & start of your blown film line with just one operator. Learn more about how TURBOSTART simplifies the process, makes it faster and safer.

10.30 AM / 5.30 PM

DIE CONTROL WIZARD @ FILMEX II

Perform product changeovers with 70% less waste and changeover time – increasing the efficiency and sustainability of your production.

11 AM / 6 PM

RUBY

Improve your production the easy way with smart data analytics – meet RUBY, the IoT System by W&H

TechArena PRINTING

9 AM / 4 PM

Introduction and Welcome
by the W&H Executive Board

9.25 AM / 4.25 PM

NOVOFLEX II

Get to know the strongest CI flexo printing press: Highest machine rigidity, consistent print quality and ergonomical handling allows you to produce more efficiently. Experience yourself how we print a most demanding motif with highest speeds.

10 AM / 5 PM

FILMATIC II

Get details on the new FILMATIC II C winder: optimized for less waste and highest winding quality. Experience the performance of this new winder on a very thin and sensitive breathable film.

10.30 AM / 5.30 PM

VISION @ MIRAFLEX II

Detect errors, learn their causes and correct them in the downstream process – Learn more about how our integrated web monitoring and inspection system VISION and RUBY go hand in hand for intelligent print production.

11 AM / 6 PM

HELIOSTAR II, 25 micron MDO PE

In this sessions we will show you how gravure printing in 7C achieves excellent print quality and high speeds on new sustainable materials, like 25 micron MDO PE.

TechArena CONVERTING & PACKAGING

9 AM / 4 PM

Introduction and Welcome
by the W&H Executive Board

9.25 AM / 4.25 PM

AD Profilm AD

Combine long product shelf life, product protection and high speed and dust free filling with the AD proFilm MP – The Best Sift-Proof Valve Sack On The Market.

10 AM / 5 PM

MATADOR E-Commerce

Paper mailer bags are on the rise in the e-commerce market – learn more about how to produce the sustainable solutions with a version of the proven MATADOR made especially for E-Commerce bags.

10.30 AM / 5.30 PM

TRIUMPH 5-F6

If large order volumes and speed play a major role for you, learn more about the high performance machine TRIUMPH 5-F6, which is used for medium and large size block bottom bags. A new chapter in the TRIUMPH success story.

11 AM / 6 PM

TOPAS SF

Learn more about the new technical features for highest production, easy operation and more reliability in the world class FFS-Machine by AVENTUS.

W&H VIRTUAL EXPO

22 & 23 JUNE
2021 (CEST)*
